

CLEARDEF™

Driving Clean Diesel Technology

CLEARDEF is API Approved and meets all ISO 22241 manufacturing standards.

DIESEL EXHAUST FLUID

ISO 22241

DIESEL EXHAUST FLUID (DEF)

API Approved

Meeting the Strictest Standards of Performance

WHAT IS DEF?

Diesel Exhaust Fluid is a purified solution of 32.5% urea in deionized water. It is a colorless, odorless, non-hazardous, non-flammable solution made from natural gas. In an effort to protect our natural environment, DEF is injected into the exhaust system of Selective Catalytic Reduction (SCR) equipped diesel vehicles to convert noxious NOx into harmless nitrogen gas.

WHO WILL NEED DEF?

Federal law requires most 2010 diesel engines to be equipped with Selective Catalytic Reduction (SCR) technology. These vehicles will require the use of DEF. The Engine Manufacturers Association has estimated the U.S. DEF demand at 1.3 billion gallons a year by 2019. DEF will be sold in retail stores, auto parts stores, convenience stores and fueling stations nationwide.

HOW CAN I PURCHASE DEF?

Cul-Mac is YOUR supplier for DEF. Available for purchase in: 1 gal., 2 gal. Box, 2.5 gal., 5 gal., 55 gal. Drums, 275 and 330 gal. Totes.

Part Number	UPC CODE	Size	Pallet Qty.	Weight
5165	0 20954-05165 0	(2) 1 Gallon Color Retail Box with spout	84 cases	20 lbs./case
5166	0 20954-05166 0	(4) 1 Gallon and (4) spouts 4 Pack Carton	36 cases	40 lbs./case
5164	0 20954-05164 0	(2) 2.5 Gallon Case	40 cases	50 lbs./case
5167	0 20954-05167 0	5 Gallon Container	32 containers	50 lbs./container
5169	0 20954-05169 0	55 Gallon Drum	4 drums	560 lbs.
5168	0 20954-05168 0	275 Gallon Tote	Bulk	2,850 lbs.
5170	0 20954-05170 0	330 Gallon Tote	Bulk	3,400 lbs.
